New Unnamed Ideal Darwins
Special Wayside Gardens Selection

Obtainable from Wayside Gardens Only

This mixture contains a very complete selection of new Ideal Darwins. It stands to reason that it is impossible to introduce all the new things that are being produced by the originator. Therefore, many magnificent seedlings must be destroyed in order not to bring out too great a selection of varieties, many of which are often much alike. It is those unnamed but truly choice seedlings, as well as many of the named varieties that compose the selections we are offering you. The price is surprisingly low.

*PRICE OF IDEAL DARWIN SELECTION

Darwin Tulips

The Best Standard Varieties

The colors include the brilliant scarlets and crimsons, and the more somber tones of red. The shades of rose and pink, of violet and purple, are unsurpassed for their delicacy or their richness of color. There are slate blue and blue-violets which might almost be called blue, while Dumas' "Black Tulip" is very nearly realized in some of the dark maroon varieties. Bronze and buff tones must be looked for among the Breeders. The varieties offered are the best standard kinds; inferior sorts have been omitted.

The figure following the name indicates the relative time of flowering.

Breeder Tulips

Their somber and remarkable colors place them distinctly in a class by themselves. Every lover of rich pastel shades cannot fail to revel in the gorgeous and artistic blendings of purple and old gold, bronze and terra cotta, brown and violet, and buff and maroon found among the Breeders. The flowers are, many of them, sweet scented, and all splendid for cutting.

All indifferent and “muddy” colored varieties have been removed from this list.

*Garibaldi. 3. $5.10 per 100; $46.00 per 1000. Base and center of petals terra cotta with broad edge of golden bronze. Exquisite colorings; strong growth; one of the choicest. Height 31 inches.

*Godet Parfait. 2. $4.10 per 100; $36.00 per 1000. Its wondrous bloom and rich deep purple color touched with feathers of brownish black which are almost indistinguishable, make it exceedingly handsome. Height 29 inches.

*Golden Goblet. $6.50 per 100; $60.00 per 1000. A magnificently formed and beautifully toned old gold, cup-shaped flower. A truly handsome Breeder Tulip without dullness of color so often found in Breeders. The “old gold” blossoms are alive and sparkling, yet with a restraint that be-speaks fine breeding. The flowers last long, standing up well in great heat; unquestionably the best variety in this collection. We have for four years requested the production of a large quantity so that at time of introduction it could be offered at a moderate price. Can be had this year from Wayside Gardens only.

*Golden West. 2. $9.50 per 100; $90.00 per 1000. A tremendously large flower on a tall and stiff stem, dull golden buff, center greenish yellow. Height 32 inches.

*Heloise. 3. $4.70 per 100; $42.00 per 1000. A beautiful combination of deep brown and old rose. Inside deep brown edged golden bronze, base yellow. Large flowers with reflexing petals. Height 28 inches.

*Indian Chief. 3. $6.60 per 100; $61.00 per 1000. Perhaps the most artistic of all Breeder Tulips; a flower of enormous size carried on a very tall stiff stem. Of glorious coloring and in every way desirable for every purpose. The beautiful intriguing color is of an Indian-brown, flushed coppery brown; a very effective dark, wood-brown Tulip with a burnished metallic sheen and illusive rose-colored lights. One of the handsomest of the brown Breeders, standing on a stem 38 inches high.

*Jaune d’Oeuf or Sunrise. $4.30 per 100; $38.00 per 1000. Deep lemon-chrome, with a slight flush of pale purple on the outer segments, large, pale green base; filaments greenish. Height 29 inches.

*Louis XIV. 2. $4.30 per 100; $38.00 per 1000. Rich dark purple, shaded steel-blue, heavily flushed bronze, edged golden brown; enormous size and stately bearing. Height 30 in.

*Lucifer. 3. $4.70 per 100; $42.00 per 1000. Bright terra-cotta-orange; enormous flowers; a variety of great brilliance. An exquisite flower for the border as well as for cutting. Height 24 inches.

*Pink Pearl. 2. $4.70 per 100; $42.00 per 1000. A wonderfully effective flower of fine form, lilac-pink with rosy bloom; interior rose, shaded creamy white. Height 26 inches.

*Prince Albert. 2. $4.30 per 100; $38.00 per 1000. Glowing mahogany-brown, shaded dull bronze, green base. Splendid for the border. Height 30 inches.

*Prince of Orange. 3. $3.90 per 100; $34.00 per 1000. Large, very showy, well formed flower of great substance; terra cotta, edged orange-yellow, base yellow streaked with olive, filaments olive. Height 26 inches.

*Roi Soleil. 3. $4.10 per 100; $36.00 per 1000. A wonderful combination of dark violet-blue and shades of bronze. Fine large, well formed flower. Plant with yellow Pansies. Height 28 inches.
Breeder Tulips—Continued.

William the Silent. $9.00 per 100; $87.00 per 1000. What a marvel is this among the purple Breeder Tulips! Its widely opened cup of warm, reddish purple, its generally superb appearance, the fine texture of its petals make it an outstanding purple Tulip, and one deserving its illustrious name. The flower is carried on a strong tall stem. With its striking creamy base outlined with blue, and its purple-violet anthers, it is a variety to adorn the stateliest garden. A beautiful combination may be had by planting Cottage Tulip Mayflower or a similar shade amongst, or in front of, William the Silent. Height 30 inches.

*Choice Mixed Breeder Tulips. $3.90 per 100; $34.00 per 1000. Mixed bulbs, as a rule, do not appeal to the planter because of the difficulty in the blending of colors. Breeder Tulips, however, are in a class by themselves, and their colors do permit easy blending. They are in shades of bronze, golden bronze, violet, buff, maroon and terra cotta. We suggest a liberal planting for cut flowers.

Chinese Lantern Tulips
(Fairy Tulips)

For the time being we will offer these gorgeous hybrids under separate heading. Should we have offered them for sale in the alphabetical list of Tulips they would be difficult to describe or might be overlooked.

Imagine a handful of Tulips having the delicate pure pastel shades of our finest Sweet Peas and you have but a fair description of their colors. The general effect, however, is that of lighted, delicately colored Chinese Lanterns. The perfectly formed globular blossoms glow with an iridescent light not heretofore seen in Tulips. The colors are too exquisite to accurately describe. They have been admired by visiting growers from all over Europe.

The introduction of these lovely hybrids has been given to Wayside Gardens. The colors are all in those elusive tints of salmon, orange, and salmon-pink of the most delicate pastel shades yet brilliant and vibrant with life. They are late flowering, blooming after most of the Darwins are out of bloom.

The Cottage Tulips come into bloom in early May. They are hardy and robust, with long, slender, but very stiff stems. The flowers are mostly long and oval, many of them with the petals gracefully reflexed. The Cottage Tulips as a class are rich in the more delicate and artistic shades of pink, yellow, orange, and fawn with salmon, old rose and amber. They are best of all Tulips for cutting and should be planted outdoors. They will last for many years.

Bizarre and Bybloem Tulips

(Old Dutch Tulips)

Bybloem and Bizarre Tulips are "rectified" Breeder types. The Tulips are of an old race which has been grown in Holland and in France since the beginning of the seventeenth century, and which caused the famous Tulip craze in 1635. The Bybloems are queerly striped and feathered rose or violet on a white ground. The Bizarres have dark brown stripes and feathering on a yellow ground. They flower about the same time as the Breeder and Darwin Tulips but do not grow quite so tall, and are seen at best advantage when planted in clumps in the herbaceous border or among evergreens and shrubs. They are above all sensational show Tulips. All form rare artistic beauty.

Easily forced and grown indoors and tremendously long lasting; both indoors as well as out. In the garden they will outlast any Tulip in existence. The bulbs multiply rapidly. May we suggest you plant a few this fall.

Varieties indicated by a star are stocked in quantities.
Single Early Tulips

Few, if any, of the spring-blooming flowers rival the Single Early Tulips for brilliancy of bloom or ease of culture. They are excellent subjects for formal beds on the lawn or for garden borders. While they do not possess the same size of bloom and length of stem as the May-flowering Darwin, Breeder and Cottage varieties, they are used where earlier blooms are desired. Many of the varieties may be forced in bloom in January, while all of them may be easily had in flower in pots late in February or early March.

Note: The letters A, B, and C following the varieties indicate their relative earliness of bloom, but, with few exceptions, most of the varieties bloom outdoors about the same time when planted in masses. The figures indicate the height in inches.

Brilliant Star. A 12. $3.70 per 100; $32.00 per 1000. Bright vermilion-scarlet, same color as Vermillion Brilliant, but larger and of great substance. Splendid early forcer, flowering easily for Christmas.

*Cramoisi Brilliant. A 14. $3.70 per 100; $32.00 per 1000. Brilliant scarlet. A splendid bedder and forcer. Very handsome.

*Couleur Cardinal. C 12. $3.70 per 100; $32.00 per 1000. Brilliant crimson-scarlet with a deeper tone or bloom on the outer petals. A bed planted wholly of this variety is a grand sight. Fine for midseason forcing.

*De Wet. B 16. $3.20 per 100; $38.00 per 1000. Golden yellow, flushed deep orange; large, sweet scented flower of erect habit. Quite different in color from any other variety.

*Flamingo. B 12. $3.90 per 100; $34.00 per 1000. Carmine-rose, shaded lighter. The petals are stripped white and very crinkled, giving the flower a decidedly artistic appearance. A very popular variety among florists for forcing on account of its odd color and habit.

*Fred Moore. B 12. $3.70 per 100; $32.00 per 1000. An improved form of Thomas Moore. Deep, ruddy apricot, shading at the edges of the petals to dull orange-yellow; center marked olive-green; medium sized flower; sweet scented. A lovely color when forced.

Golden Brilliant. A 14. $3.80 per 100; $38.00 per 1000. Deep golden yellow, egg-shaped, very substantial flowers carried on tall stems, which makes them excellent for forcing. One of the earliest yellows which should be much more used for early forcing.

*Keizerskroon. A 15. $4.10 per 100; $36.00 per 1000. Bright crimson-scarlet, edged clear, rich yellow; excellent, large flower on long stem. Fine bedder; splendid for forcing.

Lady Boreel. B 13. $4.10 per 100; $36.00 per 1000. Large, long, snowy white flower of splendid shape. The finest white for bedding, and superb for pots or pans. Cannot be forced as early as White Beauty.

*Le Reve (Hobben). C 14. $3.90 per 100; $34.00 per 1000. This variety is excellent for late bedding. The color is old rose, flushed buff; very large, globular flower with rounded petals and carried on a strong stem.

Max Havelaar. B 14. $3.90 per 100; $34.00 per 1000. Very close in color to watermelon-red; rather large, well formed flowers.

*Mon Tresor. A 12. $4.30 per 100; $38.00 per 1000. Large, pure golden yellow flowers. Mostly used for growing in pots or pans, for which purpose it is best.

Pink Beauty. C 12. $4.10 per 100; $36.00 per 1000. Bright cherry-rose, center of petals striped white. It has no equal as a forcer, for the stem is strong and the white center of the big, fleshy petals shows up very conspicuously against the broad, vivid rose edges. Does well in pans, but not before March.

*President Lincoln. B 12. $3.90 per 100; $34.00 per 1000. Large flower of clear magenta-violent, slightly paler in tone when grown indoors. A variety that looks well when bedded out with a pale yellow variety.

White Beauty. C 13. $5.10 per 100; $46.00 per 1000. A very lovely sport from Pink Beauty, with large, white flowers of beautiful, globular form and great substance. Splendid for forcing and excellent for outside bedding when used with Pink Beauty.

*White Swan. C 14. $3.70 per 100; $32.00 per 1000. A lovely, graceful early Tulip for the garden. Large, oval, pure white flower on long, curving stem. Goes very well with purple Pansies or under Wisteria.

*Superb Single Mixed. $3.60 per 100; $31.00 per 1000. This is our own special mixture which we recommend where the best results are desired in beds of mixed colors. This mixture is made up of hundreds of named sorts and in equal proportion of each variety.

*Rembrandt Tulips

Rembrandt Tulips are nothing more or less than Darwin Tulips in which white, lavender, red and other colored stripes or flakes have appeared. The blending of colors is at all times in perfect harmony and most attractive and colorful. They are especially fine when used for cut flowers. They bloom at the same time as the Darwins and require the same care. We advise their use in a mixture only.

*Finest Mixed Rembrandt Tulips. $4.60 per 100; $41.00 per 1000.

*Note: The letters A, B, and C following the varieties indicate their relative earliness of bloom, but, with few exceptions, most of the varieties bloom outdoors about the same time when planted in masses. The figures indicate the height in inches.

*Available in limited amounts only.
Multiflowered Tulips

Bunch-flowering or Multiflowered Tulips are a most interesting lot. Instead of producing the conventional single stem with one bloom on top the varieties offered under this heading all grow a strong main stem with from 3 to 6 branches, half way up the stem, each side shoot or branch carrying its own flower. The result is that blooms on top the varieties offered under this heading all grow a strong main stem with from 3 to 6 branches, half way up the stem, each side shoot or branch carrying its own flower. The result is that 3 to 6 or sometimes 8 flowers are obtained from one bulb. All the flowers on one stem.

Parrot Tulips

The artistic form and coloring make them especially suitable for cut flower purposes. In the garden, if planted in borders or groups, they are not always satisfactory as they lack the vigorous, straight stems of the other Tulips with the exception of the Darwin Tulips. They are extremely effective planted in long drifts in front of evergreens.

Chameleon Tulips

Here we have a collection of new Tulips which in form and shape resemble the Darwin Tulips; the coloring, however, reminds one of the Cottage Tulip Picotee.

When Chameleon Tulips first come into bloom they show only faint tracings or delicate margins of pink on the edges of the flower petals, with the development and consequent aging of the bloom these markings enlarge and gradually spread over the entire flower. The blossoms never look the same from day to day and it is truly fascinating to watch this change of color taking place. At opening the flowers are largely white with faint signs of a delicate rose-pink; spreading over the entire flower as it matures.

Some 20 varieties are under observation which will not be offered by name for some time to come, but we have arranged for the distribution of a number of bulbs in a mixture of unnamed varieties. In our trial grounds they were greatly admired, you must add a few to your collection of bulbs.

**Chameleon Tulips in Mixture of Unnamed Varieties.**$2.45 per 12; $17.00 per 100.

Botanical Tulips and Species

Tulip species, coming as they do from southern Europe and Asia, should all be planted in dry, sun-baked locations. No water should reach the bulbs during the summer.

The following collection of Tulip Species or Botanical Tulips includes a great number of beautiful and interesting varieties, which show a bewildering variation in size and shape of flowers, structure of the leaves, habits, etc., and they only have in common that they grow wild in some part of the world, Asia Minor, Central Asia, Greece, the Mediterranean, etc. Cultivation has not modified them and they may be planted in the rock garden between creeping plants or in colonies in small, warm nooks, a situation where the larger flowered Garden Tulips would be out of place. (Varieties offered by the dozen we will gladly supply in quantity of three).

**Hyacinths**

Truly a precious source of scent and color, at a time when other flowers are still too shy or fearful to venture forth. No other plant in early spring displays such an abundance of jubilant tones of red, rose, lavender, purple, blue, yellow and orange. No other spring plant enriches our parks and gardens with a heart-lifting fragrance so soon after the snow is gone. No other plant requires so little coaxing to give its all, either in the garden or in the house. As house plants, in bowls with bulb fiber or on glasses filled with pure water, its "rising spire," colorful and fragrant, effects a rare and perfect quality of delight.

The most graceful Hyacinth plant is produced from bulbs about 16 to 18 centimeters in circumference. These sizes are the most suitable for outdoor planting in formal parks or in drifts. The larger, say 17 to 18 centimeters, are ideal for bowls with fiber, or clay pots and pans with soil. It is an economical grade, selling at 30 to 40 per cent less than the "top sizes." Top sizes should be used for water glasses, and for contests at shows or by those who desire the finest and largest blooms.

The New Multiflora or many-flowered Hyacinths are a new development and not generally known. These bulbs have been subjected to a special cultural treatment which prompts them to produce from 6 to 8 graceful spikes from one bulb. Delightful to look at and easily grown indoors. When buying Hyacinths, remember that size does not indicate quality. The larger the bulb the larger the bloom. Quality is necessary in all sizes in order to obtain good flowers. For 1936 we have reserved for you bulbs of the finest stock in Holland. Reports received this spring from customers who grew our Hyacinths last year have been most enthusiastic and gratifying.

*Pink.
Prices, All the Above:
$7.50 per 100. $70.00 per 1000.

French Roman Hyacinths

The flowers are delightfully fragrant and each bulb will throw up from 3 to 5 spikes. For forcing, 4 bulbs are generally planted in a 9-inch pan. Because of their early flowering and ease of growth, they are successfully grown in bowls with pebbles in the same manner as Paper-White Narcissi. Flowers may be had from December until March if plantings are made in succession.

*White.
$7.00 per 100; $65.00 per 1000. Until this year the price of the White French Roman Hyacinth has been quite high. We are glad to be able to offer this attractive early, indoor-flowering Hyacinth again at a very moderate price. Mammoth bulbs.

Roman Hyacinths, as well as Paper-White Narcissi, are very easily grown in Wayside Gardens bulb forcing fiber.
The past few years have seen tremendous progress in the development of the Daffodil. Magnificent new varieties are now available and if you are a lover of Daffodils may we suggest you plant a few bulbs of such kinds as Lord Louis Mountbatten, Lovenest, Mrs. R. O. Backhouse, John Evelyn, Loudspeaker or Moonshine. Many of our friends are growing some, selling the yearly increase to acquaintances, making a handsome profit on their investment as well as having a pleasant hobby.

- **Alasnam.** $2.35 per 12; $16.00 per 100.  
  A self-colored creamy white trumpet of the Olympia type, with white perianth petals slightly twisting and reaching forward, adding to the flower's gracefulness, giving the impression of gracefulness, despite its size; perianth deep primrose, with a pure medium yellow trumpet which is left in bold relief by the broad pointed star formed by the flat opening outer petals, an inch and a half wide; medium early, but remains until late, and is one of the longest lasting of all Daffodils in the garden or after being cut.

Has no rival at the shows.

*Hera.*  95c per 12; $7.00 per 100.
Broad-petaled creamy white perianth, star-shaped and deeply frilled cup of creamy white with a dainty edging of light primrose; one of the most beautiful of all Daffodils.

*Thalia.*  $1.95 per 12; $13.00 per 100.
In addition to a peculiar attraction at first sight, this flower leaves one with an impression that it is white, yet it is a whiteness that is not white. The recurring petals and the angle of the three trumpets are unlike the conventional short-cupped Daffodil. The stem is dark green, round and reed-like thin. Some call it the “orchid-flowered” Narcissus, which adds to the mystery. Thalia provides unusually good material for artistic arrangements. At the flower shows its “spell” evokes endless comment and we consider it one of the loveliest of this group.

**Cyclamineus Hybrids**

Division 6: Cyclamineus blood like that of Triandrus, imparts such a distinct form to Daffodils, that a separate division has been made for its hybrids, which have trumpets of rich yellow, straight and tube-like, and perianths reflexed as in a Cyclamen; very early flowering.

*February Gold.*  $1.55 per 12; $11.00 per 100.

Two to three golden, yellow, small, fragrant flowers on strong stems; lovely for cutting. Height 13 inches.

Division 8: All Poetaz are hybrids from Poeticus Ornatus and Polyanthus Narcissi. The plants are tall and vigorous growers, bearing heads of large, well formed flowers, deliciously fragrant. It is a rare old variety preserved jealously in a few old gardens and worth special care.

*Aurora.* $35c per 12; $2.50 per 100.
Neroli' yellow cup, white perianth, perfectly built flower of deep Jonquil-yellow; attractively formed, resembling a Carnation.

*Dubloon.* $70c per 12; $5.00 per 100.
A medium-sized perfectly built flower of deep Jonquil-yellow, 3 inches or more in diameter. The whole flower, as with the others in this class, is of the greatest substance, keeping in perfect condition exceptionally long both in the garden and when cut.

*Indian Chief.* $3.50 per 12.
Very large and very double, bright yellow interspersed with orange; the petals curled and twisted.

*Mary Copeland.* $1.80 each.
One of the famous varieties of the new semi-double type, this variety has been termed the most striking double in cultivation; the longer petals are pure cream-white with a golden ray down the center, interspersed with shorter petals of lemon and brilliant orange, giving a three-color effect; unsurpassed for garden or show.

*Snowsprite.* $1.35 per 12; $10.00 per 100.
A double Leedsi; flowers borne on tall stems; pure white, interspersed with very light lemon; a novelty and a good florist's flower, extremely late.

It is double, of the semi-full type, the petals alternating a soft primrose and clear orange, and so arranged as to give the flower a most attractive appearance, and making it a most adaptable flower for large scale decorative work; is very free flowering and hardy and we sincerely believe will be used by every commercial grower.

It is a splendid show flower.

**Paper-White Narcissus**

Plant different lots every three weeks from October 1st until March 1st, and you can enjoy a constant succession of bloom.

**Paper-White Grandiflora.**

Little Daffodils

For the Rock Garden.

The following are charming little subjects for rock work, where their dainty flowers are seen to perfection. They should be left undisturbed for years, and if happy, will soon establish themselves and afford a lovely picture in early spring. All the Bulbocodium (except Monophyllus) and the Cyclamineus like moisture, and should, therefore, be planted at the foot of the rockery. Bulbocodium monophyllus flourishes in a warm, dry sheltered situation planted in almost pure sand. Triandrus Albus (Angel’s Tears) and Juncifolius delight in partial shade and a light, gritty soil, and should be given a well drained position.

**Bulbocodium citrinus.** $1.50 per 12; $10.00 per 100. Large sulphur Hoop-Petticoat, very beautiful pale citron-yellow. Height 6 to 8 inches.

**Jonquilla Simplex.** $1.10 per 12; $8.00 per 100. The true tiny single Jonquil. The bulbs as well as the flowers of this miniature Daffodil are not very much larger than the Snowdrop. The flowers are a pure golden yellow and delightfully fragrant; foliage is grass-like. Perfectly hardy and most satisfactory small Daffodil for the rock garden.

**Jonquilla Flore Pleno.** $1.50 per 12; $9.00 per 100. This is the charming double-flowered form of the above. Also splendid in the rockery.

**Juncifolius.** $2.10 per 12; $13.00 per 100. Small, graceful, rich yellow flowers, rather smaller than a Buttercup, with a dainty little flat crown.

**Minimus.** $3.25 per 12; $23.00 per 100. True. The smallest and dwarrest of all Daffodils, producing outdoors in February dainty little trumpet flowers of a rich, full yellow. Height about 2 inches.

**Minor.** $3.50 per 12; $16.00 per 100. True. A most graceful and charming very early flowering miniature Daffodil of Maximus form, flowers with full yellow perianth gracefully twisted and the miniature trumpet elegantly flanged at mouth. Height 6 inches.

**Triandrus Agnes Harvey** and all other Triandrus Hybrids listed on page 18 are splendidly suited for the rock garden.

**Triandrus Albus.** $1.50 per 12; $10.00 per 100. An exquisitely beautiful little species, it is of slender growth and produces a cluster of elegant creamy white little flowers with globular cup and perianth reflexing as in the Cyclamen. Height 7 inches.

**Triandrus Concolor.** $3.35 per 12; $24.00 per 100. True, bearing clusters of dainty fragrant flowers of similar form to Triandrus Albus, but of a uniform soft yellow, a rare and beautiful little Daffodil. Height 7 inches.

**Triandrus Pulchellus.** $3.35 per 12; $24.00 per 100. A very beautiful little Daffodil with elegant clusters of flowers, primrose perianth and creamy white cup. Height 9 inches.

Daffodils for Naturalizing

The greatest and most effective use of Daffodils is to naturalize them in quantity in meadows and orchards, in woodlands and along the driveway, on the bank of the brook or along the shrubbery.

By planting some bulbs on the south side and some others facing north, a long period of flowering, lasting well over a month, may be enjoyed.

Daffodils are the most prolific of flowers. If you plant a single bulb it will not be long in gathering a family, and in the course of two or three years the spot in which it grows will have become as populous as the tents of the patriarchs.

Planting mixed Daffodils is an investment that pays large dividends, if the right varieties are used.

The mixture presented by us is made up from named varieties and especially adapted for naturalizing and will give an abundant and prolonged flowering period, increasing from year to year.

*Mixed Daffodils, Standard Mixture. 100 bulbs for $4.25; 1000 bulbs for $35.00; 10,000 bulbs or more, special prices on request.*

*Mixed Daffodils, select mixture containing standard varieties as well as novelties. 100 bulbs for $5.25; 1000 bulbs for $45.00.*

Lilies

Lilies, unlike Tulip bulbs, are not all grown in one locality under one and the same conditions, but are gathered together from many foreign countries. All ripen off at different times of the year; therefore, orders for Lilies cannot always be filled at one time. The requirements of Lilies vary with each variety. We have a booklet on their culture, which will be sent to you upon receipt of 25c.

We offer a Mixture, consisting of carefully selected coloring; a splendid investment that will increase in value and beauty from year to year. Only limited stock is available.

*Batemanniae.* Each, 25c; $2.00 per 12; $15.00 per 100. Clear, glowing apricot flowers, from 3 to 4 inches in diameter, on stems about 3 feet high, borne from 4 to 6 in a terminal umbel or cluster; free of spots. Is at its best early in August.

The Madonna Lily is one of the loveliest of white Lilies, popular throughout the world, loved and admired by all. Its delightful fragrance and lovely white flowers have made it a universal symbol of purity. Plant it in groups of three or more bulbs, close to the pale blue Delphinium Belladonna. It will be the loveliest spot in your garden during late June and early July. Madonna Lilies are simple to grow if you will plant in full sun and perfectly drained soil. Most Madonna Lilies are grown in France. Bulbs from the north of France are better than those grown in Southern France. We offer, therefore, northern French grown bulbs as follows:

*NORTHERN FRANCE GROWN BULBS*

- **First Size Bulbs. Northern French.**
  - $1.35 per 12; 100 bulbs for $9.00.
  - Large Size Bulbs. Northern French.
  - $2.00 per 12; 100 bulbs for $15.00.
  - $3.75 per 12; 100 bulbs for $25.00.

Delivery of Candidum Lilies about September 1st to November 15th.

**TWO LILIES FOR INDOOR GROWING**

*Longiflorum Harrisii* (Bermuda Easter Lily).

Extra bulbs. 7 to 9 inch circumference. This is the most popular size to grow as pot plants for decoration and equally as valuable for forcing. Bulbs should produce from 8 to 12 flowers.

- $2.50 per 12; $18.00 per 100.

Mammoth bulbs. 9 to 11 inch circumference. These are usually grown for specimens in pots for exhibition and decorations. Each bulb should produce from 12 to 18 flowers.

- $4.00 per 12; $30.00 per 100.

The short time required to bring this peerless Lily into flower renders it invaluable. The flowers are delightfully fragrant, pure waxy white, and if cut when partially open can be kept for 2 weeks. Bulbs potted in September can be had in flower in December, if desired. A succession of bloom can be kept up throughout the winter by bringing in a few pots of bulbs from cold frames at intervals. Blooming plants in pots are suitable for Easter offerings and presents. Bulbs ready for shipment—August to December.

*Longiflorum giganteum* (Japan Easter Lily).

Extra bulbs. 9-10 inches. $3.00 per 12; $20.00 per 100.

This Japanese type is highly thought of for late winter and Easter forcing—though the bulbs of this variety are often carried over in cold storage to be brought into bloom at any desired time the succeeding year. The plant is of sturdy stocky growth, with black marked stems. The flowers of purest white are the largest of the Longiflorums. For shipment—October to December.

**SPECIALY HARDY RUSSIAN STOCK**

Grown for The Wayside Gardens exclusively. This strain is very hardy and rugged, available only in a limited number of bulbs. Especially good for late planting, many of the Mammoth bulbs are Double Nosed, giving two or more flower spikes.

- **First Size Bulbs. Russian grown.**
  - $3.00 per 12; 100 bulbs for $20.00.
  - Large Size Bulbs. Russian grown.
  - $4.00 per 12; 100 bulbs for $30.00.
  - Mammoth Size Bulbs. Russian grown.
  - $7.00 per 12; 100 bulbs for $38.00.

**TWO EXCEPTIONALLY FINE GARDEN LILIES**

*Philippinense formosanum*. Each, 25c; per 12, $2.00; 100, $15.00.

Not unlike the Regale Lily in general appearance. The slender stem is covered with the same grassy foliage of the Regale Lily. The substantial blooms are trumpet like, in fact, they are long lovely white flowers with a beautiful pale emerald-green throat which gives the flower a distinct and delicate appearance. They commence blooming in early August and flower until stopped by frost. Bulbs when established will produce 3 to 4 spikes each with 4 or 5 blooms. It is a most liberal flowering Lily, to all of which may be added that they are among the easiest grown. If properly planted about 4 inches deep in well-drained sandy soil and given a little covering during the winter they will safely go through the coldest weather. August to November flowering. Height 3 to 4 feet.

*Testaceum*. Top size bulbs, each, 75c; per 12, $8.25.

Fine first size bulbs, each, 60c; per 12, $6.50.

Also known as "Excelsum" and as the "Nankeen Lily." One of the choicest garden Lilies. The warm apricot tone, almost a cafe au lait, set off by brilliant orange anthers, puts it in a color class by itself; in fact, many people consider it the most graceful and lovely of all Lilies. It is beautiful for every kind of garden use but because of its tender coloring, must not be planted in a mixed border with brighter flowers. In combination with light-shaded Delphiniums or with the Madonna Lily, which it resembles, it is most effective. It has the texture of Lilium Candidum, with reflexed petals and does well under the same conditions as Candidum. Four to five feet high, June-July flowering.

**Lilium Regale**

(*The Regal or Royal Lily)*

One of the most beautiful and one of the hardest Lilies in cultivation—"Lilium Regale" is truly a Royal Lily, worthy of a place in every garden; it is a lover of loam and sunshine. A vigorous grower with sturdy stems, 4 to 6 feet high, densely covered with fine foliage. Center of flower flushed with yellow, shading to white at the outer edges; externally the flowers are streaked with brown on the "ribs," shaded through the almost translucent petals with a delightful pearly tint; the contrast between the color of the reverse of the petals and the gold shading of the throat is extraordinarily beautiful. The Regal Lily is very floriferous and when thoroughly established, bears as high as 18 and 20 flowers during the season. They succeed in any good, rich garden soil, that is well drained. Because Regal Lilies flower so easily from small inexpensive bulbs, we offer this variety in many sizes, to suit everyone's purse. We recommend, however, sizes 6-7 inch, 7-8 inch, and 8-9 inch circumference.

Flowering Bulbs. 4-5 inches.

- $0.80 per 12; $6.00 per 100; $45.00 per 1000.

Flowering Bulbs. 5-6 inches.

- 90c per 12; 100 bulbs for $6.00; $55.00 per 1000.

Flowering Bulbs. 6-7 inches.

- $1.25 per 12; 100 bulbs for $8.00; $70.00 per 1000.

Flowering Bulbs. 7-8 inches.

- $1.50 per 12; 100 bulbs for $10.00; $90.00 per 1000.

Autumn and Spring Flowering Crocus Species

Besides the Dutch Crocuses there are certain species that bloom very much earlier in the year, often before the snow has gone. The flowers of these wild sorts are smaller than those of the Dutch kinds but they are as vigorous and free as the others. Given a sunny position in the rock garden or a sheltered position in grass where the sun may encourage them freely, they will surprise you by their hardy appearance in the face of cold and storms.

Crocus Imperati, pale lilac with buff jacket, often flowers in late February, and is closely followed by Crocus Sieberi, a fuller purer mauve sort; it has as a companion the deep rich yellow Crocus Susianus, which is even more attractive in the bud stage with its dark, rich brown flowers on the exterior of the segments. Once planted, they will take care of themselves for many years. Then comes Crocus Tommasinianus, an exquisite vascilelike form, in color varying from a pale mauve to quite a rich purple. This variation is one of its great attractions. These all increase as freely as do the Dutch varieties.

**Colchicum—Meadow Saffron**

(Giant Autumn-Flowering Crocus)

Colchicum are autumn-flowering bulbs with large Crocus-like blossoms which appear during the months of September and October, without foliage. The foliage, however, appears early in the spring about the same time the Tulips and Hyacinths are in bloom and disappear in June. They are especially recommended for planting between the taller growing rock plants such as Cerastium, Vinca, Pachysandra and the various Sedums, where their bold, checked Crocus-like blossoms are seen to the best advantage. Blooming in September and October when flowers in the rockery are scarce, they are especially valuable. They may be also planted in the open woods or in naturalistic plantings of any sort. The bulbs, if kept indoors, will bloom during September and October in the window without any earth or water and after blooming, the bulbs may be planted in early November outdoors, and will not suffer in the least.

**Eremurus 3-Year-Old Seedlings.**

During the past few years there have been many requests for Eremurus seed and young plants. The seed of Eremurus is difficult to germinate; we, therefore, never offered it because it was bound to lead to disappointment. Seedling roots, one or two years old, are too small for the average person to care for, but we are now able to offer some fine roots which are three years old. We know these will grow without trouble and surely bloom within two years. These young roots are unnamed; but are the same varieties as offered on page 47. It will be well worth your while to plant a few of these healthy young roots for growing on.

**Eremurus.**

$30.00 per 100; $275.00 per 1000.

3-year-old, unnamed seedlings.
Dutch Iris

Improved Spanish Iris—For Garden Planting.

This very distinctive group is of recent origin and has in a few years won international recognition. The flowers are not only superior in substance, brilliance and purity of color but also earlier, larger and of greater refinement than the old Spanish Iris. The new hybrids we offer are readily distinguished by the narrow orange stripe on the falls, while the older varieties have a larger yellow blotch. These Iris are unsurpassed as cut flowers, since they will stand any amount of handling, lasting fully a week in water. Their hardness and interesting color range have made them very popular for garden planting. In extreme climates they need some protection. The varieties we list have been carefully selected to give the full range of colors.

<td>These magnificent bulbous Irises thrive in any ordinary garden soil but prefer a good loam. The earlier the planting, after beginning of September, the greater the success; the bulbs should be planted 4 inches deep. The varieties contained in our mixture, we have especially selected as being the very finest and most distinct in cultivation, and they will be found as strikingly beautiful in color as many of the sumptuous orchids. They flower from end of June to beginning of July, thus succeeding the Bearded Flag Irises, Early Xiphium and Spanish Irises. As cut flowers they take a first place.</td>

Iris Reticulata

Fragrant Iris—Hardy with Protection.

Reticulata. $10.00 per 100; $95.00 per 1000. This lovely species is one of the treasures of the garden or rock garden. It can be described as a small form of the Spanish or Dutch Iris. Its main value lies in the fact that it may be forced into bloom in the house with the greatest ease. Six or eight bulbs put into a 4- or 5-inch pot when received will bloom about Christmas time. The fragrant blossoms remind one of a bunch of fresh violets. Perfectly hardy with reasonable protection. It is one of the loveliest early flowering bulbs for the rockery. To show it off well, plant a number of bulbs under the white Arabis Alpina; you'll enjoy the results more than we can tell you.

Varieties indicated by a star are stocked in quantities.

An interesting bulbous flower sometimes called the Blue Freesia, for it is rather similar in both flower and culture. The colors vary from gentian-blue to wine-purple. They reach a height of about 8 to 10 inches. For Northern climates they should be grown like the Freesia for living room or conservatory decorations, but in mild climates they should be used in the rockery where they make magnificent brilliant masses of color.

Brodiaeas (Hardy—Give Light Protection)

Small bulbs producing grassy leaves near the ground, and very slender but stiff naked stems bearing a head of waxy flowers of great lasting quality. Their culture is the same as for Narcissi and just as easy as for that flower. They are easily naturalized in almost any soil. Plant them about 3 inches deep and leave them alone. They are especially happy under oak and deciduous trees, in the rock garden, or in rough, gritty soils.

Anemone

For the Garden, Rock Garden and Naturalistic Planting

(A Half Hardy—Must Have Protection)

These popular flowers of French origin are exceedingly brilliant when in flower and excellent for cutting. They like to be planted about 6 inches deep in a cool, moist but well-drained soil. They will establish without any trouble and remain for years. For Northern states we advocate early spring planting, for the Southern section of the country, fall planting is best. Cover in winter with strawy manure.

*St. Brigid. 70¢ per 12; $5.25 per 100.

These are the popular Anemone so frequently seen in the florists' shops in the early spring. The flowers are unusually large, with a wide range of rich and brilliant colors.

*DeCaen. 60¢ per 12; $4.00 per 100.

The plants are taller in growth than the St. Brigid and more single. They contain many fine shades of blue, white and scarlet.

*DeCaen. 60¢ per 12; $4.00 per 100.

We can supply in mixture only. Delivery from November until April of giant bulbs guaranteed to bloom.

*Halliana squamigera. Each, 80¢; $8.00 per 12.

Produces in early spring attractive green foliage which grows until July when it ripens and disappears. About a month later, as if by magic, the flower stalks spring from the ground to a height of 2 to 3 feet, developing an umbel of large, lily-shaped flowers, 8 to 12 in number, of a delicate lilac-pink shade. The bulb is perfectly hardy; must be planted in fall. Cover crown about 4 inches.
Bulbs should be set with the crown, or top, protruding just above the surface. When in growing condition, warm water given several times during the week will hasten the flowering period and increase the number of blooms. Plant but one in a pot. We call especial attention to the Yellow Calla, which is one of the grandest varieties in cultivation, and most valuable for house or conservatory decoration. Plant Callas indoors in the late fall of the year. In April or May dormant bulbs may be planted near in the pool in a sunny spot where they will flower beautifully in August or September.

*Elliottiana (Yellow Calla). $3.00 per 12; $25.00 per 100.
One that should be planted extensively. The deep golden yellow flowers are truly magnificent and produced in abundance. The green foliage is spotted white, which adds to its beauty; lovely house plant as well as garden subject.

*Godfrey (White Calla). $2.20 per 12; $15.00 per 100.
Most ornamental foliage if grown near pool where it will get plenty of water; an excellent, easily grown house plant.

### Calochortus
(Hardy—Give Slight Protection)

Until one has seen a good collection of these plants, he has no idea how much Nature can do in the variation of one flower. All Mariposas are forms of Calochortus, yet there are several strains, all with the slender grace of stem belonging to the species. Cup-shaped flowers, one to many on a stem, wonderfully marked with eyes and dots and penicillons in rich colors, are characteristics. Yet each strain carries out the plan on a color scheme of its own, and then can be compared only with the orchids in wonderful variability of beauty. “Mariposa” is simply the Spanish word for butterfly, and is applied to these Tulips because the eyes and markings of the flowers are so much like those on a butterfly’s wings. The bulbs are small and should be planted about 2½ inches deep and covered during winter.

*Venustus El Dorado. 60c per 12; $4.00 per 100.
They grow from 1 to 2 feet high and branch. The flowers are simply marvelous in their variety of colors and markings. Scarcely two are alike; in a mixed lot they may vary through white, lilac to purple and again through shades of pink to deep claret-red. In any mixture whites, more or less eyed, predominate. There is no better investment for the flower-lover than a quantity of these bulbs. They thrive best in a rather porous soil, either sandy or gritty, and will grow either in sun or light shade. Flowers are 2 to 4 inches in diameter. Mixed colors.

*Venustus Oculatus. 60c per 12; $4.00 per 100.
Wonderfully varied in whites and creams. More or less tinted purple, and with very rich eyes. We have had the flowers 4 inches across. The plant is a good grower, and the flowers are most satisfactory.

*Finest Mixed Colors. $5.25 per 12; $37.50 per 100.
This is a lovely mixture containing many varieties; planted in a sheltered spot in the rockery they will make a charming lot of color.

### Camassia
(Hardy)

There are few bulbous plants that meet climatic or soil conditions better or give a more attractive bloom. They are hardy without protection, and thrive either under ordinary garden conditions or when naturalized in open, moist woods or in not too dense a grassy growth. The flower stems are 3 to 4 feet high with as many as a hundred star-shaped flowers measuring 1½ inches across and flowering in long succession.

*Escolenta. 50c per 12; $3.50 per 100.
Very showy in mass plantings. Forms flower spikes 2 feet high, bearing a cluster of star-shaped flowers of a very fine, rich purple. Plant 4 inches deep. Extra heavy bulbs.

*Leichtlini. $1.00 per 12; $7.50 per 100.
Same as preceding but stronger grower, flowers are larger and come in various hues of blue and creamy white. Extra heavy bulbs.

### Chionodoxa—Glory-of-the-Snow
(Hardy—Give Slight Protection)

A mass planting forms one of the most sumptuous displays of floral beauty, a mass of blue and white, intense and brilliant. They bloom at the time of the Crocuses, producing dwarf flower spikes, bearing from 12 to 15 flowers of a sky-blue with a pure white heart, creating a lovely effect. They should be planted in the fall, 3 inches deep, about 18 bulbs to a square foot, in a sunny location or in half shade and in places where they can remain undisturbed for a number of years. The flowers will cross with one another and will seed themselves, forming natural colonies. All are 6 to 7 inches high, therefore, excellent in the rockery as well.

### Standard Varieties

*Luciliana. Top size bulbs, $2.25 per 100; $20.00 per 1000. Bright blue, white center. Flowers often with 6 to 8 blooms on each stem.

*Sardensis. Top size bulbs, $2.50 per 100; $22.50 per 1000. Same as above with true gentian-blue flowers.

### Rare and Unusual Varieties

Gigantea (Alleni). 55c per 12; $3.75 per 100. Large light blue flowers.

Gigantea alba. $2.10 per 12; $14.00 per 100. Rare variety with large snowy white flowers.

Luciliana alba. $2.10 per 12; $14.00 per 100. A very beautiful pure white variety of the Luciliana.

Luciliana rosea. $1.35 per 12; $10.00 per 100. A fine variety with pink flowers of the Luciliana form.

Tmolii (Tmolusii). 65c per 12; $4.75 per 100. Bright blue and white, flowers later than Luciliana and is very useful for prolonging the flowering season of these charming bulbs.

### Eranthis—Winter Aconite
(Hardy—Give Slight Protection)

Plant Bulbs Immediately Upon Receipt

These produce about two weeks before the Crocuses are in bloom, little yellow flowers like Buttercups about 3 inches above the ground, with settings of fine green, frilled collars which never seem to mind the worst of weather conditions. Will thrive under trees where few other plants can hold their own. They seed themselves freely and colonies from self-sown seed are soon formed. Plant at once upon receipt, firmly, 2 inches deep in shade or full sun, about 18 bulbs to a square foot.

*Cilicia. $3.25 per 100; $30.00 per 1000. Deep yellow flower, foliage bronze and finely cut; lovely rock garden variety.

*Hyemalis. $3.00 per 100; $27.50 per 1000. The common Winter Aconite, clear yellow, very early. Good for the rock garden, under Sedums or under trees. Plant bulbs at once when received.

P. S. A lovely combination of early flowering bulbs is Crocus Tommassianus, pale lilac, with the cheerful yellow Eranthis Hyemalis; both poke their blossoms through the snow before the winter has gone and both flower at the same time.

Varieties indicated by a star are stocked in quantities.
Eremurus

A noble family of hardy plants, most delightful and desirable for stately and colorful groups in large plant borders and shrubberies. They are perfectly hardy, and when well established, produce dozens of giant flower spikes, like huge Hyacinths, attaining a height of from 6 to 10 feet, the flower spike (comprising several hundred flowers) being from 2 to 3 feet long. They thrive in any sunny, well-drained border. They should be planted in early fall only. These wonderful, gigantic flowering plants do not require a great depth of soil, as the fleshy roots spread outwards. The plant disappears above ground after flowering and annuals may be planted close to them to fill the vacant space. A light mulching is advised as a winter protection.

The following list includes some of the finest and rarest in commerce, all flowering in July. No. 1 and No. 2 size roots not guaranteed to bloom first year. See page 43.

*Robustus. No. 1 size, each, $1.75; top size, $2.00.
Rosy pink flowers in a spike 3 to 4 feet long, standing on an 8- to 10-foot stem. One of the finest in the group.

Shefford. No. 1 size, each, $1.25; top size, $1.75.
Coppery yellow inside, tinted ruddy bronze outside. Flowers arranged close together on an 8-foot spike.

Tubergeni. No. 1 size, each, $2.00; top size, $2.75.

Erythronium - Trout Lilies

These are charming woodland plants, producing in early April, small Lily-like flowers of which the colors run in delicate tints of white, pink, cream, bright yellow and rose. They thrive in wooded places under shrubs and in shaded corners or crevices of the rockery.

*Californicum. 70c per 12; $5.25 per 100.
Cream colored, often with 4 or 5 flowers on the stem. Leaves richly mottled. A large colony is a beautiful sight.

*Californicum Bicolor. 70c per 12; $5.25 per 100.
The flowers open upwards showing the inner half to be rich chrome-yellow, the outer half pure white, and are deliciously fragrant. It grows easily and flowers freely.

*Citrinum. 70c per 12; $5.25 per 100.
A native of Southwestern Oregon; is rather stouter in habit than the last; flowers creamy at the outside, citron center.

*Grandiflorum robustum. 90c per 12; $6.75 per 100.
A most distinct species, usually found in the mountains of the West. The leaves are not mottled but a plain green. The flowers are of the brightest buttercup-yellow.

Their beauty is enhanced by their richly mottled leaves. They like a light, rather moist but well-drained soil. Plant the corms about 3 inches deep. All grow about 6 to 7 inches high.

*Henderson. 70c per 12; $5.00 per 100.
Like Californicum but the flowers are a lovely light purple, with the centers a deep maroon, almost black.

The most beautiful of all the Erythroniums. A stout plant producing exquisite rose-pink flowers.

*Mixed. 65c per 12; $4.50 per 100.
This mixture is made up of the above named varieties and many others. Splendid for naturalizing and for rock garden in light shade.

Freesias

Without doubt the most sweetly scented flower grown; a single bloom permeates the living-room with its delicate perfume. Although they are quite popular and very easily raised, we suggest the following treatment: Procure the bulbs as early as possible and plant them in August to 25 bulbs for a single pan. The soil should be a mixture of good loam. The bulbs planted early, say August and September, must be placed outdoors until cold weather sets in; must be regularly watered and kept growing all the time. In November, before frosts appear, the pots should be placed in the window of a cool room.

*Apotheosis. 60c per 12; $4.00 per 100.
The flowers are very large, of a beautiful shade of pink, tinted lavender and borne on long stems.

*Elder's Giant White. 80c per 12; $6.25 per 100.
Giant pure white flower on long stem. The largest white Freesia.

*Golden Daffodil. 45c per 12; $3.00 per 100.
A rich daffodil-yellow color, such as is seen in the popular Daffodil, King Alfred. The flowers are large, well formed.

*Mrs. Marc Peters. 50c per 12; $3.75 per 100.
Very attractive deep rosy salmon with splendid clear color. Extraordinary, vigorous growth and long, sturdy stems make it a valuable cut flower.

*Purity Superflora. 45c per 12; $3.00 per 100.
A magnificent, snowy white; of very large size and great length of stem. A cress bearing from 8 to 10 buds, of which six are often open at one time.

*Pink Beauty. 60c per 12; $4.00 per 100.
A giant, rose-pink Freesia with broad petals forming a flat, open flower. Greatly admired; it is like an orchid spray.

*Sunset. 80c per doz.; $6.25 per 100.
The upper portion of the petals both inside and outside, is Tyrian rose, shading down the petals to Tyrian pink. These colors are shot with delicate streaks of cadmium-yellow, becoming solid yellow down into the perianth. The flowers are large, four and five open at one time, supported by long, heavy stems with two and three long laterals.

*Sunset. 60c per 12; $4.00 per 100.
An entirely new color in Freesias, being a flame-orange, reminding one of the glorious sunsets of California.

*Wisteria. 50c per 12; $3.75 per 100.
A fine, large flowering variety in the blue shades. Blooms of good size and deep bluish lavender in color. One of the best, if not the best, blue-lavender.

They are very effective in colonies, requiring a somewhat dry situation. Invulnerable for the rockery, for naturalizing and very lovely grown in pans indoors; use same culture as for Freesia.

Galanthus • Snowdrops
Snowdrops belong to the most beloved early flowering spring bulbs. They require very little attention, and can remain undisturbed for years and years. They like rather moist and cool soil. To get a lovely effect they must be planted thickly, while they can be grown as bulbs. They require very little attention, and can remain undisturbed for years and years. Must be planted as early as possible and have to be carefully protected against sharp winds, as the tall plants grow 4 feet and more high. They are real "Grandmother's favorites" and should be in every hardy border or old-fashioned flower garden.

STANDARD VARIETIES

*Pudica. $1.00 per 12; $8.00 per 100. Of still a different habit. A low plant about 6 inches high with a single clear bright yellow bell. Likes sandy or loose soils and a warm spot in the rockery where you will enjoy it immensely.

They should be planted in the fall and protected with straw to prevent damage from frost. Slender stems and dainty orchid-like flowers.

Ixia - Corn Lilies

These beautiful bulbs from the Cape Colony (South Africa) are far too little known; they should be planted in late autumn and in cold districts they must be covered with a thick layer of straw or leaves. **Scilla - Squill**

May-Flowering Scilla

The English Blue Bells (Scilla nutans) with its long varieties (S. hispanica) have erect flower-spikes and open campanulate flowers. All are very effective in flower and shrubbery borders, and most valuable for wild gardens and woodlands, where they should be largely naturalized. Wood Hyacinths may be planted in bare shady places and odd corners which often have a desert-like appearance which can thus be rendered bright and cheerful. They will also thrive under Fir and Pine trees, where few other plants will grow.

Scilla - Squill

The rich dark blue of Scilla bifolia and the bright blue of Scilla sibirica in early spring render them invaluable for edgings or for massing in flower beds and borders. As they bloom so early in the year, it is advisable to give them a sunny location. They are not particular about the soil in which they grow. They are ideal for the wild garden but they are not to be despised in the border, especially if they are left alone for 2 or 3 years without being disturbed in any way. They are splendid in the rock garden. Never plant less than 12 to 18 bulbs in a clump.

### Standard Varieties

The bulbs should be planted 3 inches deep, and in cold districts a covering of dry litter should be given in winter. Fine for the rock garden.

Berberis Mentorensis
U. S. Patent No. 99

STAYS GREEN PRACTICALLY THE ENTIRE YEAR

Remarkable is just the word for it. Every once in a while a new plant is created of such outstanding merit that it takes the country by storm.

Today we have in our nurseries several thousands of just such a wonder, called Berberis Mentorensis. So distinctly different and so superior to other hardy Barberries, that the U. S. Government granted us a patent on it.

There are five outstanding points of superiority about this Barberry:
First—it is evergreen practically the year around. Think what that means.
Second—its sturdy, erect growth carries a thick dark green foliage right down to the ground. Is never bare-legged.
Third—when used for a hedge, its thorny, strong growth forms a formidable barrier to man or beast.
Fourth—needs practically no pruning. Observe its erect growth which becomes dense when the plant is three or four years old.
Fifth—combined in a foundation planting with evergreens, it provides a beautiful and artistic contrast at very small expense and without elaborate preparation of soil.

A very important trait of this Barberry is that it is not “choosy” about where it grows. No matter if you can’t make other broad-leaf evergreens, such as Azaleas and Rhododendrons, thrive in your soil, this new Barberry will. It is equally at home whether it is acid or alkaline soil.

Realizing the merit of this Barberry, we have first grown a liberal quantity of plants before offering it, so that we would be able to sell this handsome new plant of unquestionable merit at moderate prices.

Phlox Columbia
The Loveliest Pink Phlox in Existence
A WAYSIDE GARDENS PRODUCTION
U. S. PLANT PATENT No. 118

After growing this variety you will agree with every person that has seen it, that it is the greatest Phlox ever introduced. Its strength and vigor is something rarely seen in plants. A well grown, two-year-old plant will produce from six to fifteen flower spikes. The foliage is rich dark green, leaves covering the stems down to the ground. Mildew is unknown to this variety. The flower stalks are about 2½ feet high, stiff and erect. The flowers, when cut, last over a week in water.

Mrs. Francis King, America’s great garden authority, writes of this Phlox as follows: “Columbia, the new cameo-pink Phlox which has just risen on the garden horizon is of most exquisite beauty. A soft pink recalling that of Elizabeth Campbell but lighter, more delicate, and with an eye of light blue which has a charming effect upon the general color of the flower, this Phlox grows to 2 or 2½ feet, very bushy, and, a fact most marvelous, it has practically no enemies. It flourishes after the coldest winter and in the hottest, driest summer. Altogether, an amazingly good addition to the list of plants which give color and richness to the midsummer border.”

New Dwarf Hybrid Border Asters

(Aster Dumosus Hybrids)

The new dwarf Asters are unquestionably among the most worth while plants that have recently come to us from England. Very neat in habit with attractive foliage and in September and October are graced with hundreds of blooms of the most delicate shades of lavender, pink and lilac. Not one person who saw them growing in our nurseries but admired them and purchased some.

They rarely exceed one foot in height and during the blooming period in September the plants are completely covered with blossoms. They are exceptionally valuable for the edging or for grouping in the front of borders and are also charming for the rock garden, coming at a time when the rock garden is void of flowers. They have been tested for three years in our nurseries and we as well as all those who have seen them proclaim these new things to be of exceptional value and merit. Perfectly hardy and grow most anywhere in any reasonably good garden soil.

Berberis Mentorensis

Stays Green Practically the Entire Year

U. S. PLANT PATENT No. 99

Remarkable is just the word for it. Every once in a while a new plant is created of such outstanding merit that it takes the country by storm.

Today we have in our nurseries several thousands of just such a wonder, called Berberis Mentorensis. So distinctly different and so superior to other hardy Barberries, that the U. S. Government granted us a patent on it.

There are five outstanding points of superiority about this Barberry:

First—it is evergreen practically the year around. Think what that means.

Second—its sturdy, erect growth carries a thick dark green foliage right down to the ground. Is never bare-legged.

Third—when used for a hedge, its thorny, strong growth forms a formidable barrier to man or beast.

Fourth—needs practically no pruning. Observe its erect growth which becomes dense when the plant is three or four years old.

Fifth—combined in a foundation planting with evergreens, it provides a beautiful and artistic contrast at very small expense and without elaborate preparation of soil.

A very important trait of this Barberry is that it is not "choosey" about where it grows. No matter if you can't make other broad-leaf evergreens, such as Azaleas and Rhododendrons, thrive in your soil, this new Barberry will. It is equally at home whether it is acid or alkaline soil.

Realizing the merit of this Barberry, we have first grown a liberal quantity of plants before offering it, so that we would be able to sell this handsome new plant of unquestionable merit at moderate prices.

Bushy, young stock, 15 to 18 inches tall: Three $1.00, Doz. $3.00, 100 $20.00.

Phlox Columbia

The Loveliest Pink Phlox in Existence

A WAYSIDE GARDENS PRODUCTION

U. S. PLANT PATENT No. 118

AFTER growing this variety you will agree with every person that has seen it, that it is the greatest Phlox ever introduced. Its strength and vigor is something rarely seen in plants. A well grown, two-year-old plant will produce from six to fifteen flower spikes. The foliage is rich dark green, leaves covering the stems down to the ground. Mildew is unknown to this variety. The flower stalks are about 2½ feet high, stiff and erect. The flowers, when cut, last over a week in water.

MRS. FRANCIS KING, America’s great garden authority, writes of this Phlox as follows:

"Columbia, the new cameo-pink Phlox which has just risen on the garden horizon is of most exquisite beauty. A soft pink recalling that of Elizabeth Campbell but lighter, more delicate, and with an eye of light blue which has a charming effect upon the general color of the flower, this Phlox grows to 2 or 2½ feet, very bushy, and, a fact most marvelous, it has practically no enemies. It flourishes after the coldest winter and in the hottest, driest summer. Altogether, an amazingly good addition to the list of plants which give color and richness to the midsummer border."
